"IMPROVED PROCESS FOR EVACUATING A THERMALLY INSULATING JACKET AND IN PARTICULAR THE JACKET OF A DEWAR OR OF ANOTHER CRYOGENIC DEVICE"

ABSTRACT

5           Improved process for evacuating the thermally  
insulating jacket of a dewar having an inner wall and  
an outer wall, with the inner space between said walls  
completely or partially filled with an insulating  
material, containing also a moisture sorbing material  
10 and a getter material, in which said moisture sorbing  
material is a chemical drying agent.
